OUR PROCESS

PRODUCE SOURCING & SELECTION

We work collaboratively with some of the largest produce purveyors in the country to source the highest quality, freshest produce available.

INSPECTION & HAND-CUTTING

Our team inspects every piece of produce by hand before it enters our line. During inspection, the produce is hand-cut as needed before it heads to processing.

MACHINE PROCESSING

Each piece of produce undergoes different processing, which can include: weighing, grading, destoning, peeling, polishing, decoring, cutting and more.

WASHING & DRYING

After processing, the produce is thoroughly washed and cleaned in our commercial washer.

MIXING & WEIGHING

After the produce is processed and washed, our produce blends must be mixed to their own unique specifications. Additionally, all produce is accurately weighed prior to final bagging.

PACKING & DISTRIBUTION

Now the produce is ready to be bagged, packed and distributed to our customers.

CUSTOM BLENDS & PACK SIZES AVAILABLE

* Based on Volume Opportunities
